

The background features two sets of overlapping teal geometric shapes in the corners. On the left, there are two overlapping triangles pointing towards the center. On the right, there are two overlapping squares, one slightly offset from the other, also pointing towards the center. The shapes are in two shades of teal, creating a modern, abstract design.

- Part 1: Setting Up The Project

<https://medium.com/codingthesmartway-com-blog/the-mern-stack-tutorial-building-a-react-crud-application-from-start-to-finish-part-1-d8d701c2995>

Full stack Authentication

We'll be creating a minimal full-stack login/authorization app using the `MERN` stack (`MongoDB` for our database, `Express` and `Node` for our backend, and `React` for our frontend). We'll also integrate `Redux` for state management for our `React` components.

Full codebase can be viewed here:

rishipr/mern-auth

Minimal full-stack MERN app with authentication using passport and JWTs -
rishipr/mern-auth
github.com

Our app will allow users to

- Register
- Log in
- Access protected pages only accessible to logged in users
- Stay logged in when they close the app or refresh the page
- Log out

This should be a solid base to build off for a more functional full-stack MERN app. Check out my [teams repo](#) to see a more feature-rich MERN dashboard

MERN Stack Tutorial

We will use the following Technologies with its version.

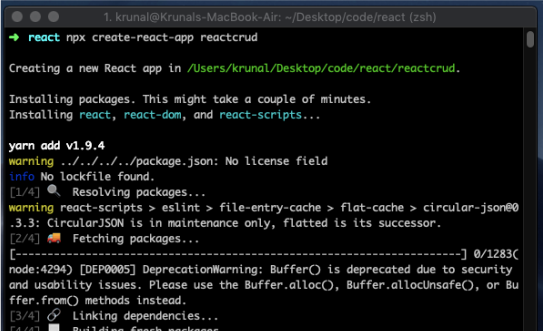

1. MacOS (Mojave)
2. Node v10.11.0
3. NPM v6.4.1
4. MongoDB shell version v3.6.3
5. MongoDB version v3.6.3
6. React.js version 16.6.1

React CRUD Example

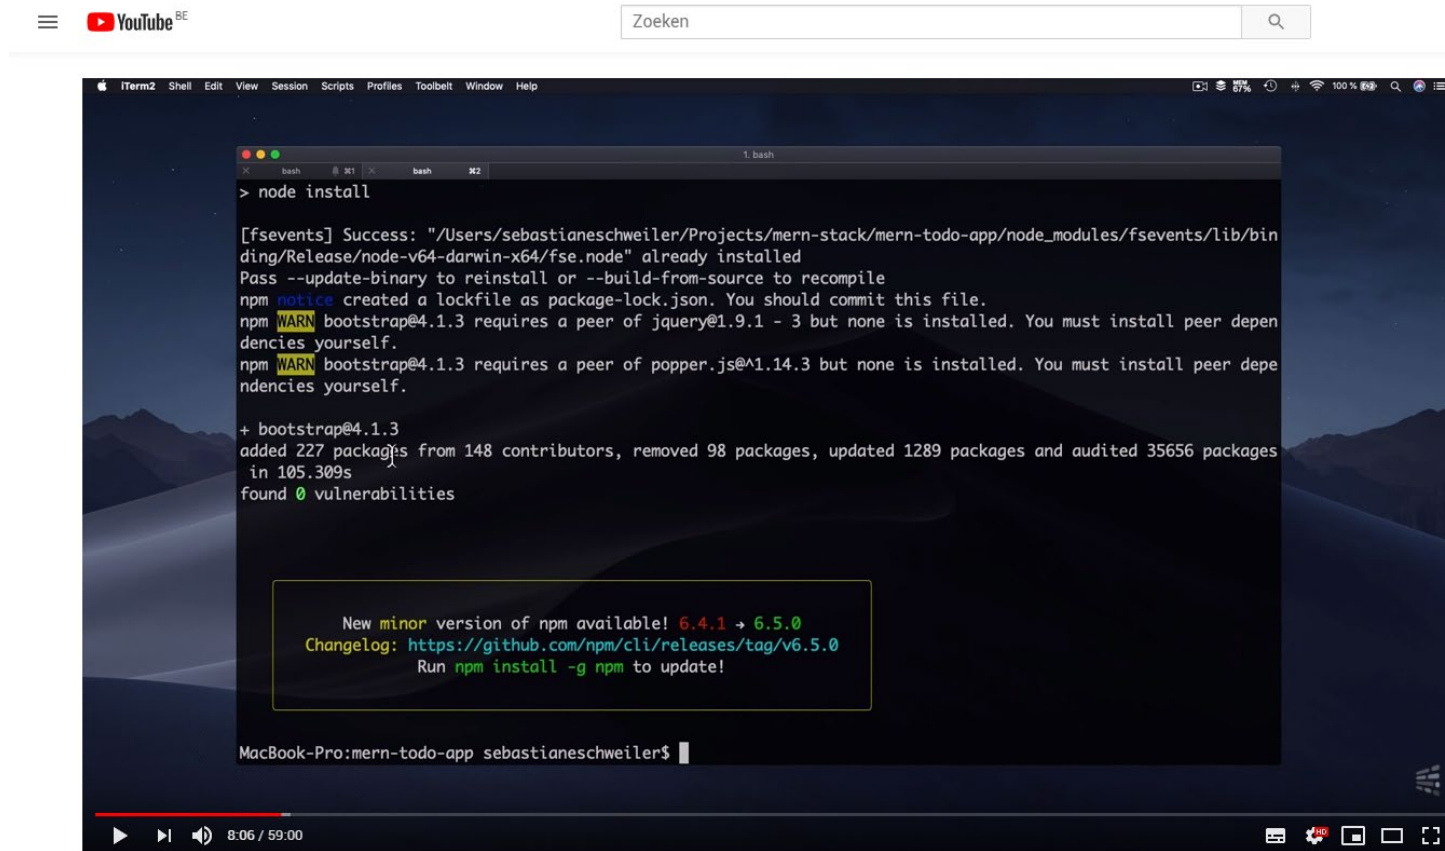

Create a new React app using the following command.

#1: Install React Application

```
npx create-react-app reactcrud
cd reactcrud
npm start
```

Understanding Mern-stack

The image is a screenshot of a YouTube video player. At the top, the YouTube logo and a search bar with the text 'Zoeken' are visible. The video content shows a terminal window titled 'iTerm2' with a dark background. The terminal displays the output of a 'node install' command. The output includes success messages for 'fsevents', warnings about peer dependencies for 'bootstrap@4.1.3', and a summary of package updates. A yellow box highlights a message about a new minor version of npm (6.5.0) being available. The terminal prompt at the bottom reads 'MacBook-Pro:mern-todo-app sebastianescheuler\$'. The video player interface at the bottom shows a progress bar at 8:06 / 59:00 and various control icons.

```

> node install

[fsevents] Success: "/Users/sebastianescheuler/Projects/mern-stack/mern-todo-app/node_modules/fsevents/lib/bin
ding/Release/node-v64-darwin-x64/fse.node" already installed
Pass --update-binary to reinstall or --build-from-source to recompile
npm notice created a lockfile as package-lock.json. You should commit this file.
